Java 9 - 16

What happened the last 7 years

Matthias

Disclaimer

- Part I (tried to focus on language Features & API)
 - maybe following parts with
 - java "internal" changes (e.g. Garbage Collector, Performance, tooling)
 - deprecations
- no guarantee on completeness

Java history

Why Java 8

- rich feature set
 - Stream API (Collections)
 - Lambda Functions & Functional Interfaces
 - Optionals
 - New Date Time API
- changed licensing which lead to confusion (Java Distributions)
- initial problems with commonly used build tools
- is a LTS version

Collection factory methods

```
List<String> list = List.of("one", "two", "three");
Set<String> set = Set.of("one", "two", "three");
Map<String, String> map = Map.of("foo", "one", "bar", "two");
```

Streams

• takeWhile, dropWhile, iterate with condition

```
Stream<String> stream =
  Stream.iterate("", s -> s + "s")
    .takeWhile(s -> s.length() < 10);</pre>
```

Optionals: ifPresentOrElse()

```
user.ifPresentOrElse(this::displayAccount, this::displayLogin);
```

JShell (Java Playground)

```
% jshell
| Welcome to JShell -- Version 16.0.1
| For an introduction type: /help intro

jshell> int x = 10
x ==> 10

jshell> System.out.println(x > 5 ? "big number" : "small number")
big number
```

Exit with

```
jshell> /exit
| Goodbye
```

(You are welcome ;-))

misc

- TLS1.3 Support
- Java Platform module System
- Flow API (reactive Streams)
- MultiResolutionImage
- Class.getPackageName())

Local-variable type Inference: varkeyword

```
// Pre-Java 10
String myName = "Volker";

// With Java 10
var myName = "Volker"
```

new methods on String

repeat(), isBlank(), strip(), lines()

var supported by lambda parameters

```
(var firstName, var lastName) -> firstName + lastName
```

HTTPClient (Preview >= 9)

new methods on String

• indent(), transform()

CompactNumberFormat class

- formating numbers for a Local
 - US: 1000 -> 1K, 1000000 -> 1M
 - IN: 1000 -> 1 हज़ार, 50000000 -> 5 क
 - DE: 1000 -> 1.000, 1000000 -> 1 Mio

Unicode 11 support

OpenJDK 13

Unicode 12.1 support

Switch Expression (Preview: 12, 13)

- new (including new yield keyword)
 - no fall-through
 - single statement and code block
 - supporting value return (with yield)

```
int numLetters = switch (day) {
   case MONDAY, FRIDAY, SUNDAY -> 6;
   case TUESDAY -> 7;
   default -> {
     String s = day.toString();
     int result = s.length();
     yield result;
   }
};
```

Helpfull NullPointerException message

```
public class NullPointerExample {
  public static void main(String[] args) (
    System.out.println("NullPointer Exception message:");

    WyClass myClass = null;
    try {
        System.out.println(myClass.myName.length());
        | catch (Exception e) {
            e.printStackTrace();
        }

        myClass = new MyClass();
        try {
            system.out.println(myClass.myName.length());
        ) catch (Exception e) {
                e.printStackTrace();
        }
        private static class MyClass();
        private static class MyClass();
        private static class MyClass();
        private static class MyClass();
        protected MyClass meAgain;
        }
}
```

• old

```
NullPointer Exception message:
java.lang.NullPointerException: null
  at de.mubn.java15.NullPointerExample.main(NullPointerExample.java:11)
java.lang.NullPointerException: null
  at de.mubn.java15.NullPointerExample.main(NullPointerExample.java:20)
```

new

```
NullPointer Exception message:
java.lang.NullPointerException: Cannot read field "myName" because "myClass" is null
  at de.mubn.java15.NullPointerExample.main(NullPointerExample.java:11)
java.lang.NullPointerException: Cannot invoke "String.length()" because "myClass.myName" is null
  at de.mubn.java15.NullPointerExample.main(NullPointerExample.java:20)
```

Text Blocks (Preview: 13, 14)

• old

new

Pattern Matching for instanceof

```
if (x instanceOf String s) {
  String a = s;
}
```

Record Type

- immutable data Class
- implicit methods -> avoiding boiler plate code
 - getters, constructor, equals, hashCode, toString

Sealed Classes (still PREVIEW)

```
public abstract sealed class Shape permits Circle, Rectangle, Square {
    // ...
}
```
